* **Black-Jack Packages Include – Pumping Hose with Handle/Injection Assembly**

When starting to manufacture Grout/Mud/Concrete pumps in 1989, Perry Hochkammer of Black-Jack Grout Pumps Inc. had a vision to design and build a pump which would meet or exceed pumping pressure and material discharge of any pump on the market. We used or examined in detail pumps from HMI, Airplaco, Chem-Grout, and other competitors.

After extensive research in the grouting and slab-jacking industry we found that customers required a cost affordable pump which will do it all, less all the non essential bells and whistles that other pumps offer.

The simple fact is this. Our competitors do not want you to know that when using the Black-Jack Grout/Mud/Concrete pump, completion of these grouting projects will be at a fraction of the cost. We are so sure of our technology, performance and customer support, we invite you to visit their web sites to compare our pumps with their's. Black-Jack Grout Pumps Inc. is the only company which fully discloses an entire price list of its pumps and accessories on its web site. Simply Google "grout pumps" and you will find all the competitors listed.

All the above information and prices were obtained by an independent consulting firm from each company listed. Although we often update information prices and features, please request a updated formal quotation from all companies listed.

Prices and features of all above pumps and packages are subject to change without notice. All trademarks and copyrights are property of the respective companies.
